Managing Editors

Ekim Arbatli, Higher School of Economics, National Research University, Moscow, Russia

Dina Rosenberg, Higher School of Economics, National Research University, Moscow, Russia

Aigul Mavletova, Higher School of Economics, National Research University, Moscow, Russia

This book series presents scientific and scholarly studies focusing on societies and political orders in transition, for example in Central and Eastern Europe but also elsewhere in the world. By comparing established societies, characterized by well-established market economies and well-functioning democracies, with post-socialist societies, often characterized by emerging markets and fragile political systems, the series identifies and analyzes factors influencing change and continuity in societies and political orders. These factors include state capacity to establish formal and informal rules, democratic institutions, forms of social structuration, political regimes, levels of corruption, specificity of political cultures, as well as types and orientation of political and economic elites.

Societies and Political Orders in Transition welcomes monographs and edited volumes from a variety of disciplines and approaches, such as political and social sciences and economics, which are accessible to both academics and interested general readers.

Topics may include, but are not limited to, democratization, regime change, changing social norms, migration, etc.

All titles in this series are peer-reviewed.

This book series is indexed in Scopus.

For further information on the series and to submit a proposal for consideration, please contact Johannes Glaeser (Senior Editor Economics and Political Science) Johannes.glaeser@springer.com.

Acknowledgments

The initiative of field research explicitly focusing on the structure of provincial local societies came from Prof. Simon Kordonsky. Over the last few years of collecting empirical data, I have discussed this work in detail with him. He is also the author of several important ideas and concepts that I develop in this book. We jointly published several articles that preceded this monograph and the materials of which are used herein. He also inspired the very idea of writing this monograph. I am deeply grateful to my senior colleague and friend.

The text is based on data collected during field research under the project *The Social Structure of the Russian Provincial Society* sponsored by the Khamovniki Foundation for Social Research. The initial fieldwork took place in 2011–2012 (Project No. 2011-002) and was later extended to 2013–2014 (Project No. 2013-007).

Subsequent fieldwork was carried out as part of research under the Academic Fund Program at the National Research University Higher School of Economics (NRU HSE) in 2017–2018 and in 2019–2020 and under the Russian Academic Excellence Project 5-100 (Grant No. 17-01-0027 *Archaic Elements in the Structure of Modern Russian Society* and Grant No. 19-01-067 *Provincial Crafts: Informal Economic Practices of the Population*).

Many of my earlier studies undertaken in the period between 1995 and 2010, which also continued thereafter, were sponsored by field research grants from the Russian Foundation for Humanities (1996, No. 96-03-18019e; 1997, No. 97-06-18005e; 1997–1998, No. 97-06-08278; 1998, No. 98-06-18011e; 1999, No. 99-06-18013e; 2001, No. 01-06-18010e; 2006, No. 06-06-18001; 2010, No. 1-03-18022e), grants from the Moscow Public Science Foundation and the Ford Foundation (1999, No. SP-99-1-14 *Dynamics of Nonadaptive Transformations of Economic Behavior and Social Values of the Population of Provincial Russia*), grant from the Regional Scholar Exchange Program 2001–2002, USA (*Social Stability and Instability on the Local Level: the Analysis of Internal Factors in Overcoming a Crisis*), and a grant from the President of the Russian Federation (through the Institute of Public Design) (No. 36/k *The Structure of Municipal Power*

and its Impact on the Development of Social Solidarity and Local Entrepreneurship, 2008-2009). My colleagues from the Institute of Philosophy and Law of the Siberian Branch of the Russian Academy of Sciences, Novosibirsk, supported me in most of these projects.

Many assistants helped me in collecting empirical data. I would like to acknowledge with gratitude the contribution made by Artemy Pozanenko, Natalia Zhidkevich, Irina Popova, Sergey Pyzhuk, Olga Molyarenko, Vyacheslav Plusnin, Anatoly Ablazhey, Yana Zausaeva, Anna Baidakova, Larisa Romanova, Artur Grishechkin, Anastasia Ivashchenko, Mikhail Olyanchuk, Alexander Pavlov, Sergey Seleev, Oleg Pisarev, Elizaveta Stepanova, Anastasia Pyanova, Alina Kulchu, Evgeny Nikolaev, Jaroslav Slobodskoy-Plusnin, and Georgy Stalinov. They participated in several expeditions and engaged in joint research. In addition, at different times, 139 young researchers from the Higher School of Economics, Moscow, took part in our study of the provincial society. Unfortunately, I cannot list them all here, but I am happy to thank them for the scrupulous and responsible collection of diverse field data in many regions of our country.

Julia Kazantseva translated the text of this monograph from Russian into English and rendered valuable technical assistance.

Contents

1	Introduction	1
2	Provincial Societies: Definitions and Conceptual Framework	5
2.1	Provincial Society	5
